

ENVIRONMENTAL MANAGEMENT SYSTEM

ENVIRONMENTAL POLICY

Pollux is committed to conducting its activities responsibly, minimizing environmental impacts and promoting the continuous improvement of its Environmental Management System. To this end, we adopt the following principles:

- Comply with environmental legislation and other requirements applicable to our operations.
- Protect the environment and prevent pollution by reducing waste, emissions, and environmental risks through simple and effective practices.
- Use natural resources efficiently, with particular attention to the consumption of energy, water, and materials used in our operations and projects.
- Properly manage waste, prioritizing reduction, reuse, and correct disposal.
- Promote environmental awareness among employees and partners, encouraging responsible behavior in daily activities.
- Continuously improve the Environmental Management System to enhance environmental performance by defining and reviewing objectives aligned with our operational reality.

This Policy guides our environmental decisions and practices, reinforcing our commitment to a safe, responsible, and sustainable operation.
